PROFESSIONAL SUMMARY

DevOps Engineer with 1 year of experience in CI/CD automation, cloud infrastructure on AWS, and containerized deployments using Docker and Kubernetes. Skilled in monitoring, troubleshooting production issues, and supporting reliable application releases in collaboration with engineering teams.

EXPERIENCE

SSP Technology, Pune **Jan 2025 – Present**
Role - DevOps Engineer Trainee *Pune, Maharashtra*

- Created and maintained Git repositories, managed access control, and followed a clean branching strategy aligned with DEV, TEST, UAT, and PROD environments.
- Managed keys, tokens, and credentials to secure Git operations and CI/CD workflows.
- Set up and maintained Jenkins pipelines, installed required plugins, and automated build & deployment processes.
- Integrated Jenkins with Maven for builds, managed `pom.xml`, and enabled basic code-quality checks using SonarQube.
- Configured webhooks for automated CI/CD triggers and ensured smooth end-to-end execution of pipelines.
- Developed Terraform scripts for provisioning AWS infrastructure (S3, EKS, RDS) using reusable components and secured Terraform state files.
- Built optimized Dockerfiles, managed container images, and pushed them to private registries.
- Created Kubernetes manifests for deployments, services, ingress, and supported scaling using HPA.
- Assisted in managing AWS EKS clusters to ensure reliable deployments, scalability, and availability.
- Configured dashboards and alerts in Datadog for proactive monitoring of applications and infrastructure.
- Responded to incidents, contributed to troubleshooting, and helped ensure minimal downtime.
